

## HOW TO INSTALL THE AUTOMATIC KNOB ON FIAT 500

Dear Customer,

Congratulations on your purchase.

In case you are not confident with any items, do not hesitate to call us, send us an e-mail or ask to your supplier.

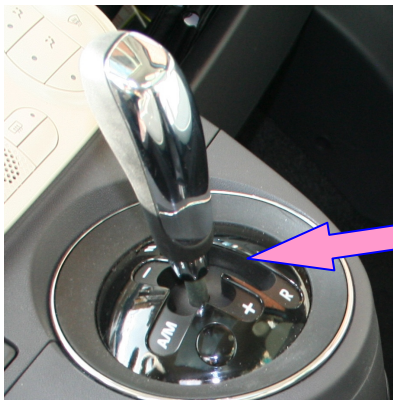

If you are uncomfortable with the mounting procedure outlined below, your local mechanic should be able to install the knob for you.

In the box you should find:

- Knob
- Set of rubber adapter
- Screws
- Hexagon key
- Instruction

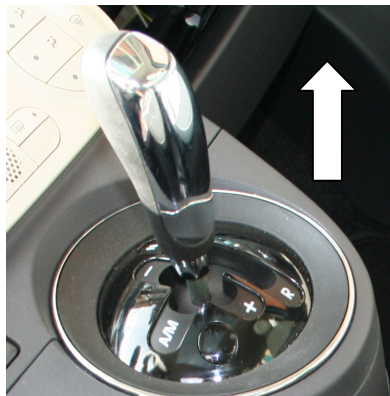

### THE MOUNTING PROCEDURE STEP BY STEP

1. The original knob is installed by pressing it. To remove it, you have to:
  - a. Remove the chrome insert located below the original knob by pushing it toward the bottom.

Push the chrome insert toward the bottom

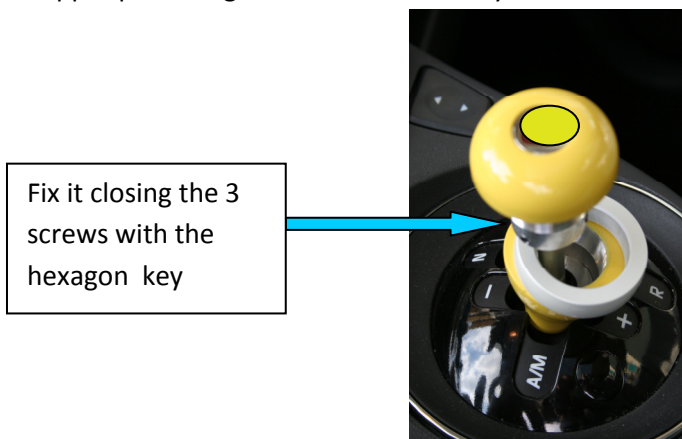

2. Pull gently but with force the knob toward the top of the car.

3. Insert one of the rubber adaptor choosing the one that fits better to the top of the gear stick.

4. Disassembly the new knob buy turning it, install the lower part of the knob, than the ring and the upper part.
5. Fix the upper part using the screw and the key.

6. Reassembly the knob by turning the lower part. Place the ring with the BLACK name, if present, in the proper location.

Before using the car on open road, test the proper fixing of the part and if you are not confident, please refer to your local mechanic or to your supplier.
